

sequoia horticultural products

Shavings

Product Specification

Species: Available in fir, pine, cedar, and redwood

Particle Size: 3/4" +, with some fines

Characteristics: Fluffy wood particles with some fines

Description: This product is derived from the surfacing of lumber at the sawmill sites. This lightweight wood material is about a 3/4" particle with some fines. Used primarily for general landscape soil preparation, as an organic amendment for container mixes, and for animal bedding. Also available in treated form.
